*Using eAcademyPLUS™ to Bring Online  
Learning to K-5 Students*

## The Benefits of eAcademyPLUS™

The purpose of eAcademy™ is to provide local school districts with the ability to build the capacity to fully integrate online learning into their schools. As we have grown, we have built partnerships that enable us to provide additional resources to our districts.

In 2017, the Westmoreland Intermediate Unit entered into a partnership with Capital Area Intermediate Unit to provide access to additional courses from content provider Accelerate Education that have not yet been developed by our eAcademy teachers. This partnership resulted in the establishment of eAcademyPLUS™, a facet of eAcademy that allows us to offer additional courses to our students by leveraging vendor-created digital courses paired with instruction from local teachers.

All eAcademyPLUS™ K-5 teachers have the required skills necessary to review, revise, and teach high-quality, rigorous, and engaging online courses that are aligned to their district's curriculum.

## Supporting Our Youngest Learners

Consistent, engaging structure that helps to alleviate anxiety and confusion that many young learners can experience

Audio and video elements help to support learners as they develop reading comprehension skills

Local educators with experience teaching K-5 students in our districts and understand our community and culture

## Course Features

### Course Structure

All Core Subject courses are divided into two semesters to help keep students organized. Each semester is segmented into Modules for students that include all instruction, videos, activities, and assignments.

### Interactive Elements

Each course is designed to be as interactive and engaging as possible. Every lesson includes video presentations, color coding, practice activities, and hands-on elements to ensure meaningful understanding. In addition, teachers can offer optional live group sessions or live one-on-one sessions to support learners and encourage collaboration.

### Learning Coaches

Learning Coaches are a critical part of learner success in eAcademyPLUS™. Each lesson includes a Learning Coach Page that has dedicated support documents and videos for parents / guardians as they support their learner at home.

### Our Teachers

All eAcademyPLUS™ K-5 teachers are full-time teachers actively teaching at Kiski Area School District. This local connection ensures that we are able to provide consistent communication and support to all of our learners.
